

Figure 1

Expression of specific markers by murine DCs obtained from bone marrow after stimulation with MALP-2 or LPS

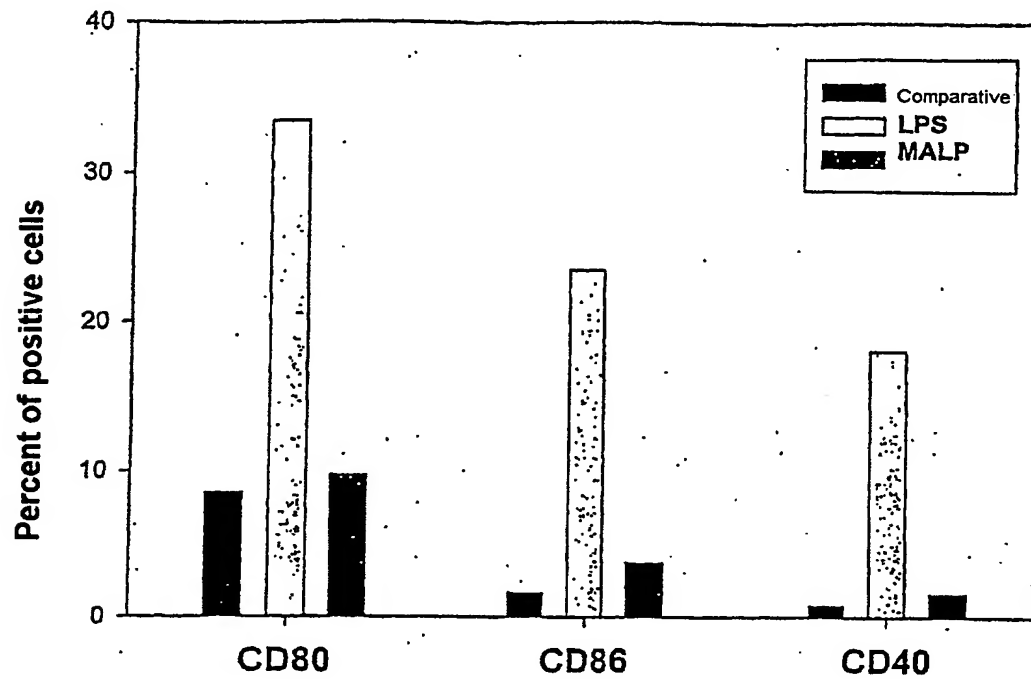

Figure 2

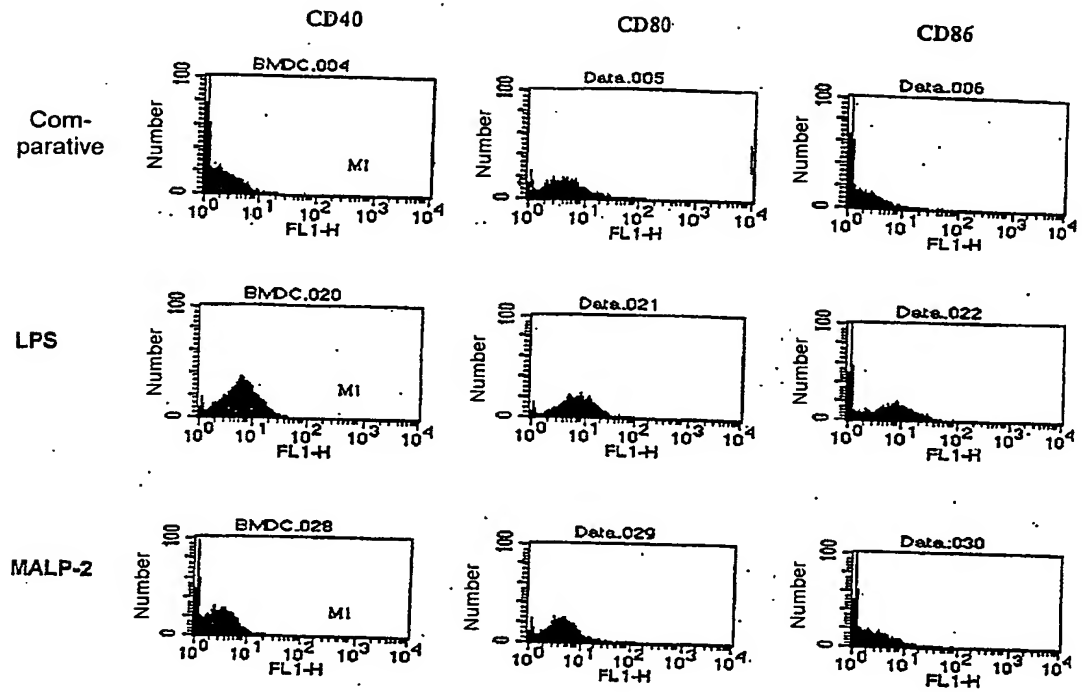

Figure 3

β -Galactoside-specific serum IgG response stimulated through use of MALP-2 as adjuvant

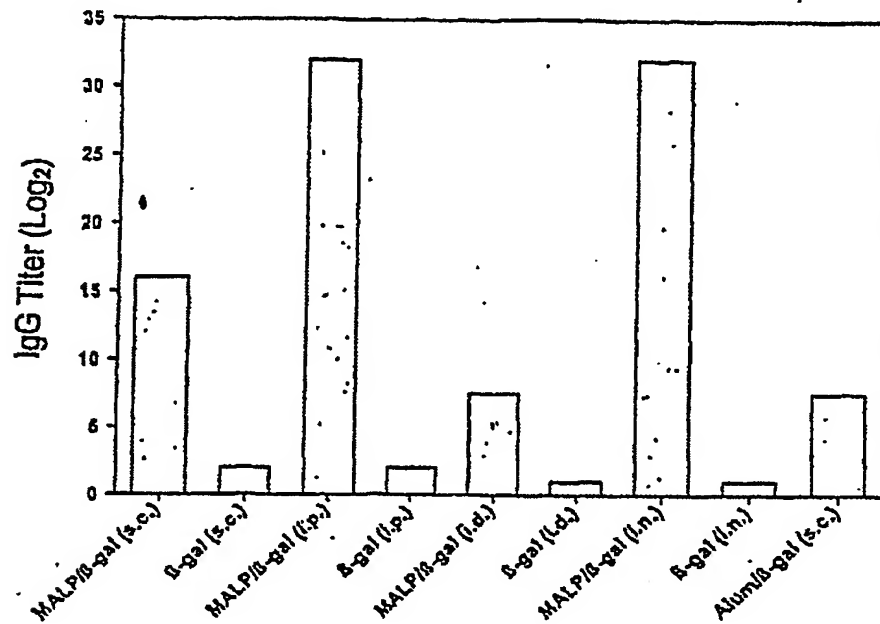

Figure 4

β -Galactosidase-specific serum IgG response stimulated through use of 1 μ g of MALP-2 as adjuvant

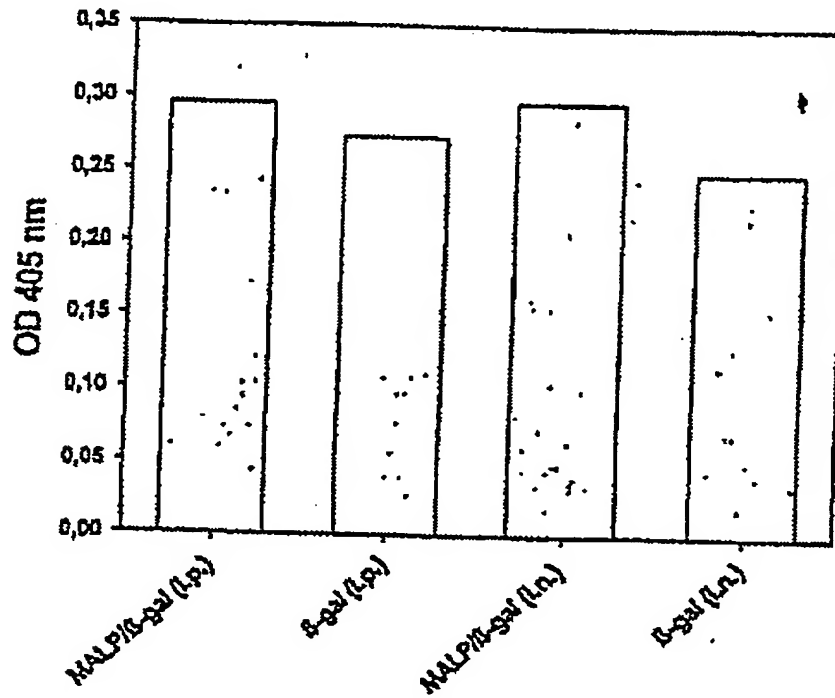

Figure 5

β -Galactosidase-specific proliferative responses
stimulated through use of MALP-2 as adjuvant

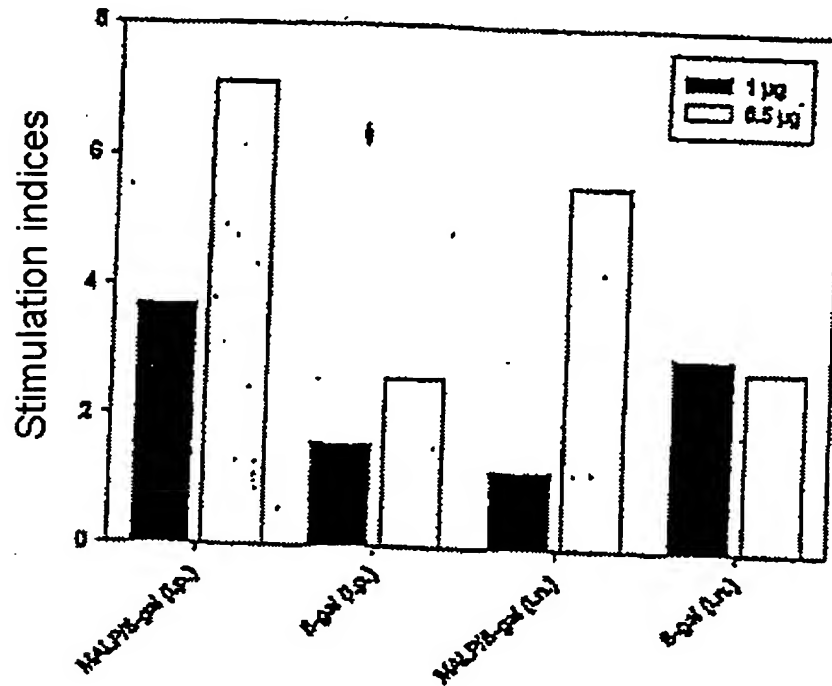

Figure 6

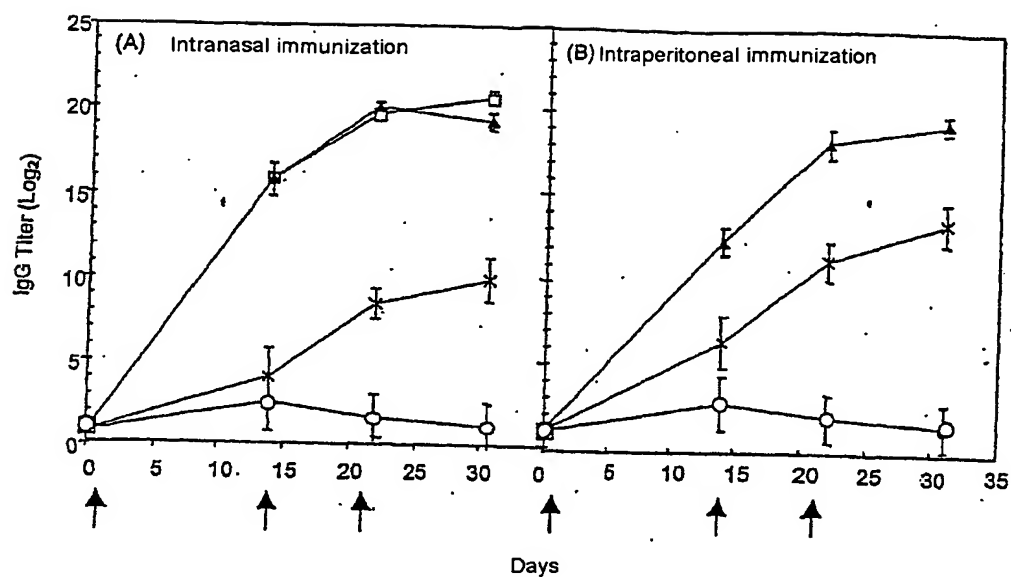

Figure 7

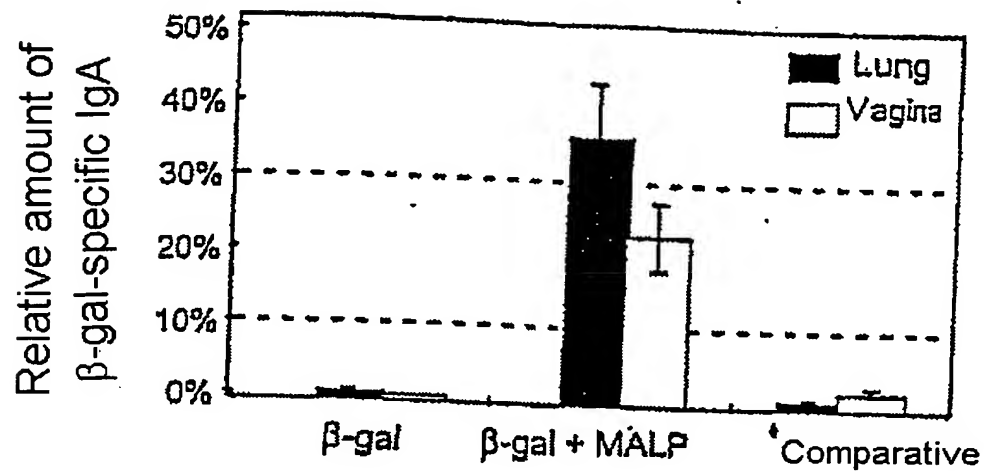

Figure 8

Determination of serum IgE in animals immunized with use of MALP-2 as adjuvant

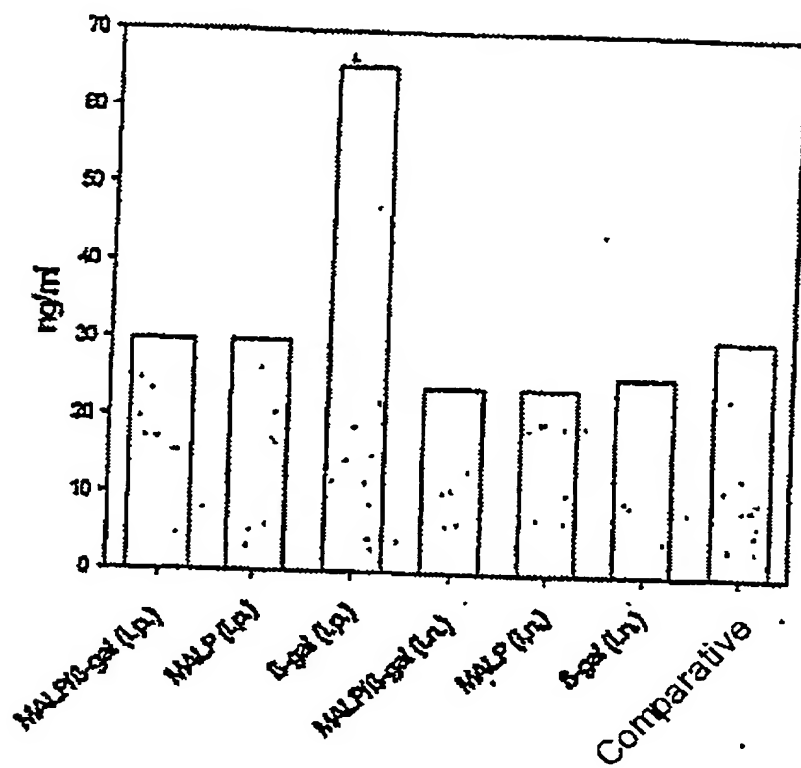

Figure 9
